Subject: Fw: Shape Files for LWG

Attached are EPA's shape files for the AOPC meeting. They are included in zip file (renamed a zap file to get through EPA's email security features). Please note that the information contained in these files are draft to be used for discussion purposes at our upcoming AOPC meeting and may be refined through future analysis.

Thanks, Eric

Subject RE: Shape Files for LWG

Hi Eric - Here you go. I tested it and made a few clarifications. Use THIS zap file, not the one sent previously. We should be all set now.

Carrie

Carrie, can you open this and confirm that it works before I send it. Ben sent me a zap file so I have the file to send to LWG. Ben suggested that someone (you) just confirm that it works. We decided to include the reference envelope toxicity results. Once I have heard back from you, I will forward.

Thanks, Eric

Sounds good Eric-

I have updated the data layers to include the bioassay data using the reference envelope, included layer files for eco and hh hilltopping scenarios in addition to the sum, and generated metadata for all of these layers.

The attached package should be ready for transmittal to the LWG.

Best,
Ben
